

# WATER- & FARM HYGIÈNE

## IntraHygiene

Essential tools  
for optimal  
biosecurity

## ARE YOU AWARE OF THE HYGIENE THREAT AT YOUR FARM?

In the intensive livestock sector, we are constantly challenged by the threat of pathogens. If pathogens succeed to enter the farm, we are facing production and economical losses, decreased animal welfare, increased mortality and a higher antibiotic use. The only way to prevent entry of diseases into the farm is with optimal biosecurity.

Our unique technology has proven to be effective against enveloped- and non-enveloped viruses in vitro under worst-case conditions according to the latest EU test standards. We are therefore very confident Intra Multi-Des GA will be effective in the worldwide battle against AI and ASF.

## THE NR. 1 PROGRAMME TO ENSURE THE BEST FARM HYGIENE

Pioneers in future proof solutions

Intracare

# Intra Hygiene concept

The Intra Hygiene concept gives you the tools for optimal biosecurity to protect your farm.

## 1 CLEAN

### INTRA FOAMCLEANER FOR HEAVY DUTY CLEANING

- ✓ Formulated for heavy duty cleaning of farms
- ✓ Fast and powerful removal of pollution by multiple mechanisms of action
- ✓ Superior foam production for maximum contact time
- ✓ Deep Clean Technology for the detachment of pollution
- ✓ Effective removal of manure, fats, grease, proteinaceous and feed residues

## 2 DISINFECT

### INTRA MULTI-DES GA FIRST AID FOR FARM BIO SECURITY

- ✓ All round disinfectant with 5 active ingredients
- ✓ Effective against bacteria, viruses and yeasts
- ✓ Already effective at 0.2% for bacteria and 0.75% for viruses
- ✓ Leading disinfectant for toughest farm conditions
- ✓ Strong residual action and wettability properties
- ✓ Extensive registrations

## 3 DISINFECT DRINKING WATER

### INTRA HYDROCARE (PT02, PT03, PT04, PT05) GUARANTEED SAFE DRINKING WATER

- ✓ Ultra stabilized hydrogen peroxide
- ✓ Slow release effect that removes biofilm till the end of the pipeline
- ✓ Eliminates bacteria, viruses, yeasts and fungi, even when they hide in biofilm
- ✓ To be used during empty- and operational barns
- ✓ Safe for humans, animals, materials and the environment
- ✓ Extensive registrations

# Contamination Sources

Biosecurity begins with an in-depth look at potential entry points and its most possible route into the farm. Movement of animals, personnel, wild animals and rodents should be kept as restricted as possible. The Intra Hygiene Concept is the solution for optimal biosecurity.

VEHICLE

BOOTS

WHEELS

FARM

DRINKING LINES

## Intra Hygiene TROLLEY

Foam lance for professional use

Handy storage

Rotary nozzle for heavy duty cleaning

Plug & Pray instead of screw treath couplings. 1 Set-up for guaranteed correct dosage.

4 wheels for mobility and stability

### BOOT DIP

Remove all dirt from the boots with a brush. Step into the bootdip with 1% Intra Multi-Des GA solution. Ensure the whole surface is submerged into the bootdip solution.

### INTRA HYGIENE TROLLEY

Intracare developed this smart tool for optimal efficiency in your biosecurity. Designed with the most exclusive and professional equipment available on the market. Plug&Pray and easy to use.

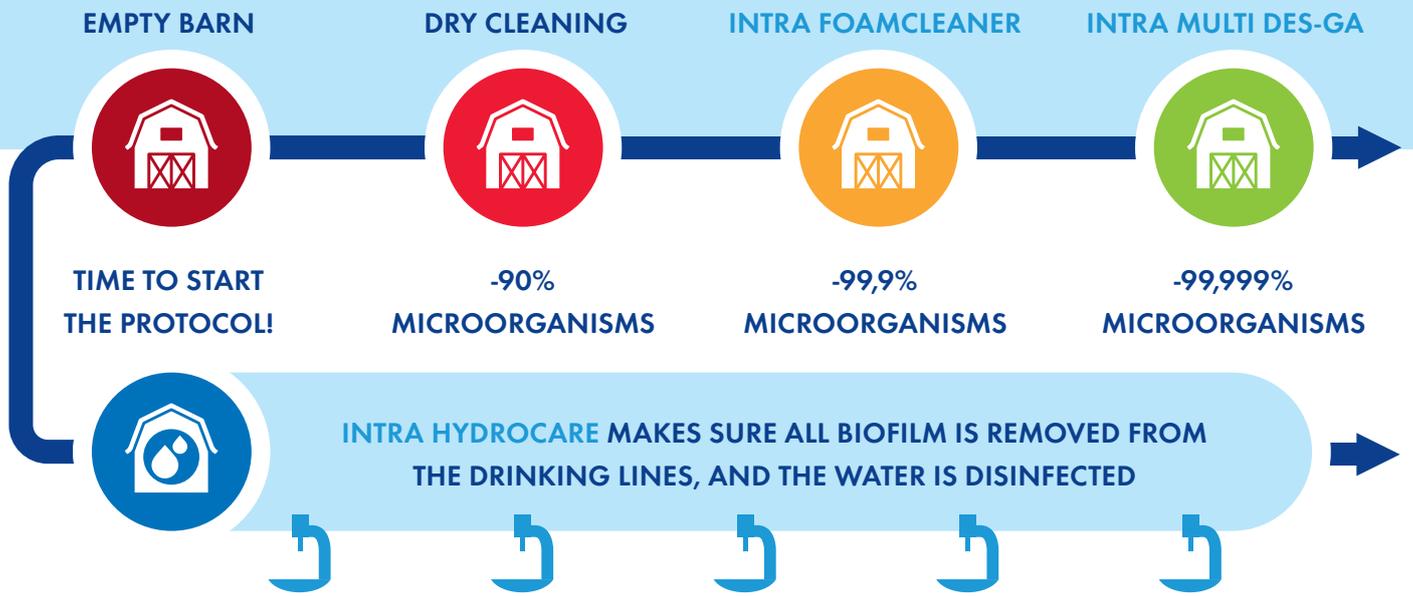

### INTRA HYGIENE QUICK SCAN

Get in control of contamination risks with real-time water analysis. The Intra Hygiene Quick Scan is the analytical technique of choice for a quick and easy indication of the water quality or the degree of pollution on surfaces.

### INTRA HYDROCARE STRIPS

With the Intra Hydrocare strips, every farmer around the world can now check the degree of pollution that is present in the water system, and immediately correct the Intra Hydrocare dosage.

To get an optimal effect of **Intra Foamcleaner**, it is important to perform dry cleaning first. Now, **Intra Foamcleaner** can already remove 99.9% off all micro-organisms. This might seem much, but there is still a big threat for animal health in the stable. Viruses and pathogenic bacteria that remain on the surfaces need to be eliminated to create a safe environment for the animals that enter the farm.

That is when **Intra Multi-Des GA** steps in: a strong disinfectant to make sure all harmful pathogens are eliminated. In the meantime, **Intra Hydrocare** makes sure all the biofilm is removed from drinking lines, and the water is disinfected.

Once the house is occupied, **Intra Hydrocare** can stay on the water in a low maintenance dose, to keep the water clean.

**Intra Hygiene programme. The nr. 1 programme to ensure optimal biosecurity.**
